

Custom color options are available, and tags can be embossed or laser-engraved with a logo or message for branding or enhanced visual identification.

TECHNOLOGY HIGHLIGHTS:

- HF 13.56 MHz version readable with ISO/ IEC 15693 compatible NFC devices with tag option for on-metal use.
- Broadband UHF version for worldwide use at 860 to 960 MHz.
- Fully interoperable, standards compliant.
- Bendable TPE and TPU housing.
- Waterproof; resistant to chemicals, impact and UV rays.
- Large user memory.

PLIABLE RFID TAGS MOUNT ANYWHERE AND ENDURE RUGGED CONDITIONS

- Flexibility Repeated bending will not impede performance; enables secure mounting on rounded or irregular surfaces
- **High durability** Resistant to liquids, dust, impact and weather extremes
- Enhanced reliability Precise, consistent read ranges when mounted to plastic or wood

HID Global* SlimFlex™ RFID tags are among the most advanced general purpose flexible tags available. The unique thermoplastic elastomer (TPE) housings - made from the same materials used worldwide to manufacture automobile pipes and hoses - tolerate repeated bending or torsion, while maintaining excellent performance characteristics. The durable housing safeguards embedded electronics, even under harsh conditions.

SlimFlex passive contactless transponders improve data collection speed and accuracy for logistics applications.

Anti-collision functionality, fast data-rate communication and password data protection enable precise, reliable reading and updating of each tag's large user memory. SlimFlex tags are compliant with ISO certified readers and modules. All SlimFlex RFID tags are waterproof. They can be used in deepsea operations, provide high resistance to aggressive liquids and UV rays, and deliver reliable performance and reading stability at high and sub-freezing temperatures.

Available in multiple configurations:

- Rectangular SlimFlex tags attach snugly to round or irregular surfaces, such as cylindrical containers, plastic pipes, helmets or even trees. These tags conform to surface contours, and can be securely attached with cable ties, industrial adhesives, rivets or screws.
- Designed for garments, each SlimFlex Laundry tag withstands chemical exposure and high temperature of related washing cycles. This small, flexible white strip can be discreetly sewn into the hem of clothing, unnoticeable to users during everyday operations. With a read range of up to 16.4 ft (5 m), SlimFlex Laundry tags enable automated sorting, inventory and accounting for commercial cleaners. For commercial linen, please refer to the HID LinTag™, which has been optimized for this use case.
- The SlimFlex Tag Washer has been designed with one reinforced hole to rivet it. This version is ideal whenever a SlimFlex tag shall be fixed with a single rivet to hang down from metal bars or be placed on a hook.

APPLICATION AREAS:

Asset tracking and logistics

- Inventory management
- Itemize tracking of pallets and goods
- Cylindrical items such as plastic bins or tree trunks

Laundry, medical & health

- Uniform companies
- Commercial laundry
- Hospital laundry
- Medical compartments

Returnable transport items

Shipping container or pallet tracking

Waste management

 Commercial and industrial plastic bin identification
