## INDUSTRY AND LOGISTICS

### **TECHNOLOGY HIGHLIGHTS:**

- Choose from 125 kHz or 13.56 MHz / NFC
- Peak temperature exposure to 266° F (130° C)
- High-impact PA6 housings
- Waterproof
- Mount-ready, via central screw hole
- Secure HID Trusted Tag\* option prevents tags from being copied

# LOW AND HIGH FREQUENCY DISC-SHAPED RFID TAGS WITH EXTREME IMPACT RESISTANCE, READY FOR OUTDOOR USE

- Durable housing withstands shock, impact and vibration; waterproof; resistant to chemical exposure
- Heat tolerant during storage, industrial processing and daily use
- Versatile mounts securely to plastic or wood with screws
- Cost-effective excellent size to performance ratios

Poly Tag passive contactless radio frequency identification (RFID) transponders deliver reliable performance in a cost-effective housing that stands up to rugged conditions. Each heavy-duty disc is waterproof, highly chemical and shock resistant, and withstands peak temperatures up to 266° F (130° C).

Poly Tag devices are housed in field-proven, high-impact PA6. This nylon thermoplastic shell absorbs the daily bumps and jolts of industrial environments, while protecting the electronics within. Exceptional toughness, chemical resistance and abrasion resistance assure consistent communications with RFID readers, and reliable performance in automation and manufacturing applications. Low frequency (LF) Poly Tag discs perform on any flat surface. They offer reliable, cost-effective tagging for near-proximity reader applications, with available data storage from a 64-bit user ID, up to 2048-bit read-write capability.

The high frequency (HF) Poly Tag disc offers anticollision technology for faster data processing, higher user memory, and an improved read range over LF discs. Chip options for NFC or HID Trusted Tag<sup>®</sup> are available to implement secure "proof of presence" applications like guard tours or maintenance checks using standard NFC phones as readers.

For additional disc-tag options, the HID IN Tag™ family also includes heavy-duty tags, in low frequency, high frequency and UHF configurations. For other applications, consider ultra-thin HID Epoxy Disc or indoor World Tag™ transponders.

## **APPLICATION AREAS:**

- Automation and manufacturing
  - Processing boxes
  - Production equipment
  - Maintenance and Inspection

#### Asset tracking and logistics

- Outdoor equipment e.g. furniture, playground items, or walls - Plastic bins
- Proof of Presence (e.g. guard tour)
