### **Circular Polarity RFID Panel Antenna**

#### 865-870 MHz 8.5 dBic CIRCULAR POLARITY PANEL

The Laird Technologies' S8658PL antenna is a circularly polarized panel antenna that provides reception and transmission of signals in the 865-870 MHz frequency band. Laird Technologies' industry-renowned design methodology achieves maximum efficiency and performance across the entire frequency band.

Both VSWR and axial ratios are excellent and allow the user to achieve the maximum performance for an antenna of this type. The antenna is housed in a heavy duty radome enclosure that can be directly wall mounted. An optional articulating mount allows either wall or mast mounting.

The antenna is offered with an integrated coax pigtail and a variety of connector types are available.
