TAGMATIKS ™

TagMatiks AT

KEY FEATURES

TagMatiks Asset Tracking (AT) is a cloud-based asset tracking platform that leverages various AIDC technologies for data collection and analysis. The technologies include RFID, Barcodes and more. TagMatiks AT improves the asset tracking process and eliminates the manual entry errors using RFID or Barcode technologies. It keeps track offull life cycle (Receiving, Checkin / Checkout, Consumed / Disposed) of your assets including scheduled maintenance or repair.
